

## Timion Child Equipment

### HEIGHT ADJUSTABLE TABLE

Adjust all four legs to the desired length. There are nine settings which are marked with circles on the table legs on the outer piece. If the circle is in the middle of the hole, the screw will be aligned with a hole and can be screwed in.

*If you are unable to assemble the Height adjustable table for any reason or if you are unable to deliver it to the child's house, please **do not hesitate to call Timion. We are happy to assist.***

The height of the table depends on the ability of the child. A child with less control will probably need a higher table.

To have a tilted surface, two of the legs can be made longer than the other two.

PO Box 4404, Aston Bay 6332, South Africa

This child is precious, of considerable value, held in honour, and especially dear! (= Gr. timion)

We suggest to use the table together with a height adjustable bench.
